

Weir Minerals

Aggregate and Industrial Minerals Products

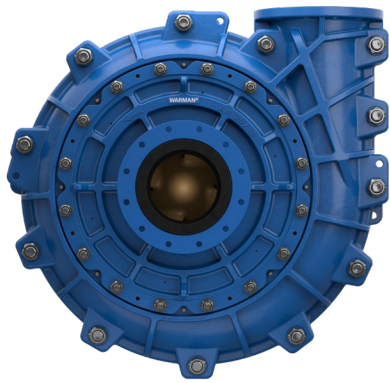

WEIR

Minerals

From plants to products

By combining our world-class engineering solutions, process knowledge and global service center network, Weir Minerals supplies individual products, designs solutions and installations of entire plants. Through our local service engineers, our teams are able to facilitate training sessions or provide rapid response – whatever your needs, Weir Minerals is there to support you.

Heavy Duty Horizontal Pumps

Our heavy duty horizontal pumps including the Warman® AH® and WBH® pump range are designed to perform continuous pumping of abrasive slurries in many applications.

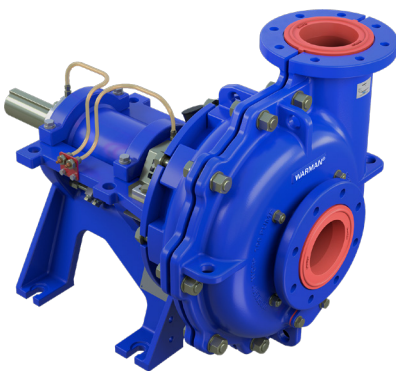

Vertical Pumps

Our line of vertical pumps is acknowledged in all industries for dependability, economical start-up cost, and low maintenance.

Warman® Submersible Pumps

Warman® SHW and SJG submersible slurry pumps provide solutions for plant sumps and tailings removal.

Warman® WGR® Slurry Pumps

The WGR® slurry pump is designed for slurry handling duties in sand and aggregate applications. It features fully replaceable liners that are manufactured from abrasion-resistant Linatex® premium rubber.

Cavex® Hydrocyclones

The innovative Cavex® hydrocyclone design provides excellent classification efficiency and hydraulic capacity.

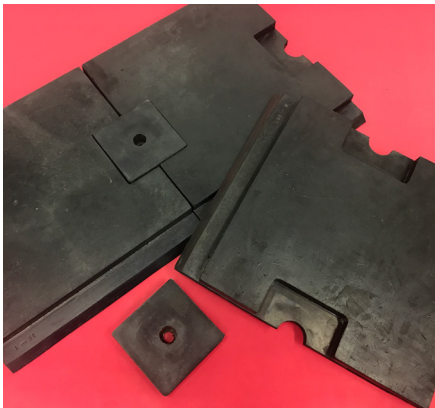

Isogate® Pinch and Knife Gate Valves

Isogate® slurry valves are the proven choice for highly abrasive slurry applications. They offer unique designs developed for ease of maintenance and low overall ownership costs.

Linatex® Hoses and Expansion Joints

Built to deliver outstanding wear performance in the most demanding applications, Linatex® hose products have a reputation for reliability and long wear life.

Linatex® Moulded Products

Our Linatex® range of Moulded Products is available for chutes and launders.

Linatex® Rubber Sheets

Linatex® premium rubber products are expertly manufactured to deliver outstanding wear performance. Available for highly abrasive wet environments and dry abrasion applications.

Hand Lining Services

Capabilities include Linatex® hand-laid cold bond lining services and hot vulcanized rubber lining. Standard and custom lined fabrications include pipe, chutes, elbows, and transition pieces.

Conveyor Accessories

Linatex® premium rubber dual-durometer belt scrapers efficiently clean conveyor belting at the head pulley in both secondary and return cleaning positions. Linard® skirt board helps keep spillage and dust contained and offers long life over traditional skirting.

Vulco® Mill Lining Systems

Our wear resistant mill linings are custom designed to optimise mill performance and productivity while reducing power consumption, maintenance downtime, and reprocessing costs.

Weir Package Plant Capabilities

Package wash plants and custom system capability to fit your specific need, from changing the design spec of your plant to building a new plant from scratch, our engineers are here to assist you.
